Monthly budget

Write the plan at the start of the month and the actual at the end: the gap shows what's slipping.

Month _____ **Year** _____

Take-home income

SOURCE	PLAN	ACTUAL	GAP
Pay 1			
Pay 2			
Child benefit, tax credits			
Housing assistance			
Bonuses, side income			
Other			
Total income			

Savings and sinking funds

ITEM	PLAN	ACTUAL	GAP
Emergency fund			
Goal 1:			
Goal 2:			
Yearly expenses fund (page 2)			
Total savings			

Fixed bills

ITEM	PLAN	ACTUAL	GAP
Rent or mortgage			
Service charges, local taxes			
Electricity, gas			
Water			
Insurance (home, car)			
Health insurance			
Phone, internet			
Subscriptions (streaming…)			
Loans (car, personal)			
Childcare, school meals			
Total fixed bills			

Day-to-day spending

ITEM	PLAN	ACTUAL	GAP
Groceries			
Toiletries, cleaning			
Fuel, transportation			
Health (out of pocket)			
Subtotal			

ITEM	PLAN	ACTUAL	GAP
Clothes			
Leisure, going out			
Kids (activities, pocket money)			
Gifts, unexpected			
Subtotal			

Left for the month

Total income _____ − Fixed bills _____ − Day-to-day spending _____ − Savings _____ = Left for the month _____

Positive: keep a margin for the unexpected, then save more. Negative: start by renegotiating a fixed bill (energy, insurance, subscriptions).

NOTES

Yearly expenses and joint pot

What doesn't come every month, and what each person pays into the joint account.

Year _____

Yearly expenses to spread over the months

EXPENSE	AMOUNT / YEAR	MONTH	÷ 12 = PER MONTH
Back to school			
Holidays and gifts			
Birthdays			
Vacations			
Property tax			
Insurance paid yearly			
Car maintenance, inspection			
Other:			
Other:			
Total to set aside each month			

Example: back to school 300 + holidays 400 + birthdays 200 + vacations 1,500 = 2,400 a year, or 200 a month. Carry this total to page 1, "Yearly expenses fund".

The couple's joint pot

☐ **50/50**
Each person pays half of the household's needs.

☐ **In proportion**
Each person pays the same % of their pay.

☐ **Same spending money**
Each person keeps the same amount for themselves.

	PERSON 1:	PERSON 2:
Take-home pay		
Share of total pay (%)		
Payment into the joint pot		
Personal expenses (tax, personal loan…)		
Spending money (pay - payment - personal expenses)		

Household needs = fixed bills + day-to-day spending + shared savings (page 1). In proportion: payment = needs × pay ÷ total pay.

The same math, without copying it every month. The Budget Famille app fills in every month from your rules, works out the joint pot with the method you choose and is shared in real time. Free: budgetfamille.com/en

Year tracker

Carry over each month's totals: you see the trend at a glance.

Year _____

MONTH	INCOME	SPENDING	SAVINGS	LEFT	RUNNING TOTAL
January					
February					
March					
April					
May					
June					
July					
August					
September					
October					
November					
December					
Total for the year					

Goals for the year

GOAL	AMOUNT	BY WHEN	PER MONTH

Per month = (amount − already saved) ÷ number of months left, counting the first and the last.
